

Haivision Media Platform

ALL HANDS | IPTV | PERFORMANCE RECORDING

Haivision Media Platform helps organize, manage and share secure, high quality live and on-demand video to every employee, on any screen – desktops, monitors and mobile devices – anywhere.

ENTERPRISE EDITION

Broadcast and Record All Hands, Town Halls and Internal Live Events Across Multiple Locations

The Haivision Media Platform Enterprise Edition helps securely distribute live and on-demand broadcast-quality video, such as CEO all hands, company events, HR updates, product launches and IPTV to employees watching on any screen globally – at headquarters, remote offices, and on the road.

SITE EDITION

Distribute IPTV and Live Corporate Content to All Screens, Desktops and Devices in Your Facility

The Haivision Media Platform Site Edition provides a powerful and easy-to-use solution to manage and deliver broadcast television channels and other live content throughout an entire facility.

WORKGROUP EDITION

Performance Recording for Research Teams and Training Facilities

The Haivision Media Platform Workgroup Edition is designed for teams that need to watch and record multiple synchronized HD video sources for review and analysis. Ideal for research of all kinds (including usability testing, focus groups, simulations, and training,) the Workgroup Edition makes it easy to record up to 50 simultaneous streams and apply powerful metadata to quickly find important moments in the video.

HIGH QUALITY

SECURE

ANY SCREEN

FLEXIBLE

SCALABLE

Complete Video Solution

Haivision is the only company that provides a complete, end-to-end enterprise media solution.

Live Internal Webcasts

Broadcast live all hands and town hall meetings so that employees can watch anywhere, on any device.

Simultaneous HD Recording

Live stream and record up to 50 HD sources simultaneously for multi-view, real-time monitoring.

IPTV Streaming

Deliver broadcast TV channels along with live internal content to every screen throughout the organization.

Video-On-Demand

Share videos and pre-recorded content with authenticated employees using a powerful content library.

Unparalleled Security

Protect live and on-demand content from unauthorized viewing, copying, and redistribution with glass-to-glass AES 128/256 encryption, including compliance to security standards for enhanced safety across information systems and organizations.

Low-Latency Delivery

Haivision's highly efficient encoding and SRT video transport technologies enable live video to be captured and delivered in milliseconds.

High Availability Option*

Decrease downtime and minimize the risk of failure of your critical system. With a cloud-inspired server cluster architecture, HMP can track and maintain the highest uptime through a secure inter-server database replication and status tracking system.

High Quality Players

Haivision's powerful hardware and software players ensure broadcast-quality viewing experiences, including support for North American Closed Captions and user-selected languages on any device.

SRT

Haivision's SRT (Secure Reliable Transport) technology enables the delivery of encrypted, high performance video over the public internet.

Multicast/Unicast

Support for virtually any WAN/LAN infrastructure with minimal IT intervention, including standards-based support for both unicast and multicast.

Multisite eCDN

Distribute live streams and on-demand video to fault-tolerant Haivision Media Gateways via WAN & internet without overwhelming the network.

Permission-Based Authentication

Support for Active Directory, LDAP and ADFS SSO ensures that administrators can easily and securely provision employees and set-top boxes with access to the designated content.

Set-Top Box Management

Centrally control and schedule when and where video is displayed on any screen - in hallways, public areas, and conference rooms and auditoriums for group viewing.

Enterprise Integration

Easily publish live and on-demand video to third-party portals such as Microsoft SharePoint.

WCAG 2.0 AA Level Web Accessibility

Haivision Media Platform grants users with visual-assist screen reader tools the ability to easily navigate and use HMP.

Metadata Tagging

Extensive file-based and real-time metadata makes content easy to find and manage.

Hybrid/Cloud

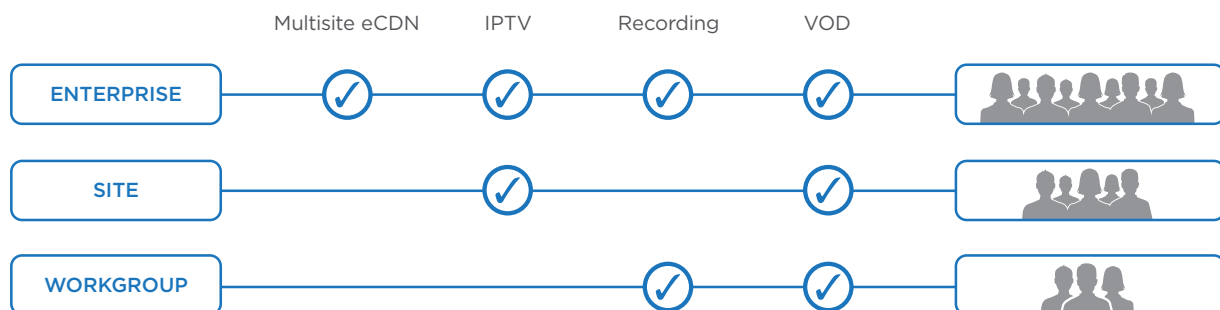

On premise, cloud and hybrid video distribution options fit a variety of needs and network infrastructures.

Unequaled Customer Support

Haivision provides several levels of customer support, including phone, remote and on-site assistance.

Watch On Any Screen

Deliver video securely to any screen, including desktops, mobile devices, and televisions. See Haivision Play for more information.

*High Availability feature is available for all editions except for Site Base. High Availability can be added to an existing virtual or physical appliance system.

BROADCAST AND RECORD ALL HANDS, TOWN HALLS AND INTERNAL LIVE EVENTS ACROSS MULTIPLE LOCATIONS

The Haivision Media Platform Enterprise Edition helps securely distribute live and on-demand broadcast-quality video, such as CEO all hands, company events, HR updates, product launches and IPTV to employees watching on any screen globally – at headquarters, remote offices, and on the road.

Securely Stream All Hands and CEO Addresses

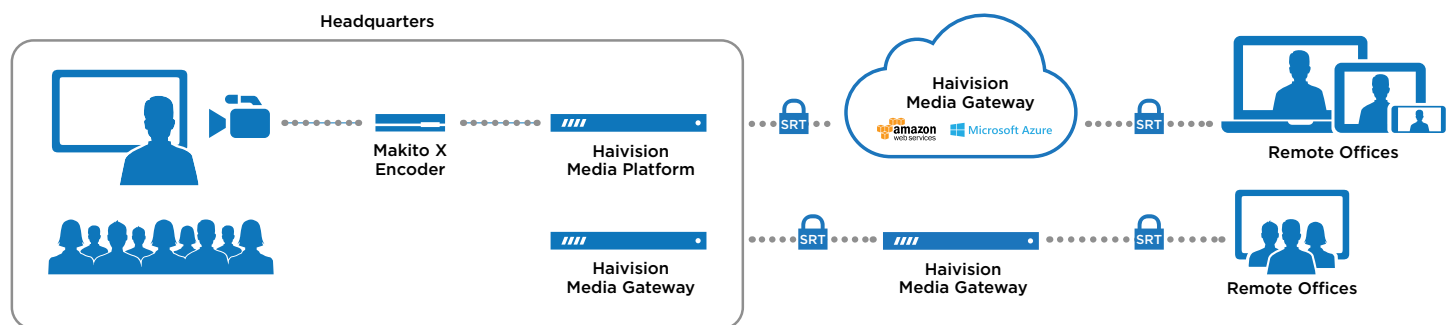

Executives expect the highest quality broadcast for their all hands meetings. The Haivision Media Platform delivers a pristine viewing experience securely to every employee on all screens – without overwhelming LAN and WAN networks. With on-premise, cloud, and flexible hybrid deployment video delivery options, the Haivision Media Platform makes it easy to broadcast confidential, must-not fail live events, such as all hands meetings, town halls and CEO addresses to offices around the world.

Broadcast from Remote Facilities

Provide travelling executives with the ability to broadcast directly from important event locations such as sales kick-offs and product launch events. Haivision solutions grant the flexibility to broadcast company meetings and important presentations from anywhere with an internet connection: remote offices, hotels, conferences and other locations. No matter the location, broadcast live with the Haivision Media Platform to employees throughout the organization so that they can feel connected during the most impactful company events.

Corporate Training and Knowledge Capture

Some of the most important video assets in an organization are those that are produced internally for corporate communications, HR announcements, and any type of workplace learning. Haivision systems make it easy to record and upload video content, apply relevant metadata and assign permissions, so users can quickly discover content from your expanding library of on-demand videos.

Add Locations – Haivision Media Gateway

Reach more locations securely and reliably. The Haivision Media Gateway scales the corporate video deployment to additional locations by bridging networks, formatting and replicating streams, and caching video content. Additionally, Haivision grants the ability to leverage Media Gateways in Azure and AWS to reach home offices and an internet connected mobile workforce.

Internet Audiences – Haivision Video Cloud

Extend well beyond the firewall to reach large scale internet audiences with live and on-demand video that can be easily published to websites, mobile apps and leading social media platforms.

DISTRIBUTE IPTV AND LIVE CORPORATE CONTENT TO ALL SCREENS, DESKTOPS AND DEVICES IN YOUR FACILITY

The Haivision Media Platform Site Edition provides a powerful and easy-to-use solution to manage and deliver broadcast television channels and other live content throughout an entire facility.

Corporate TV

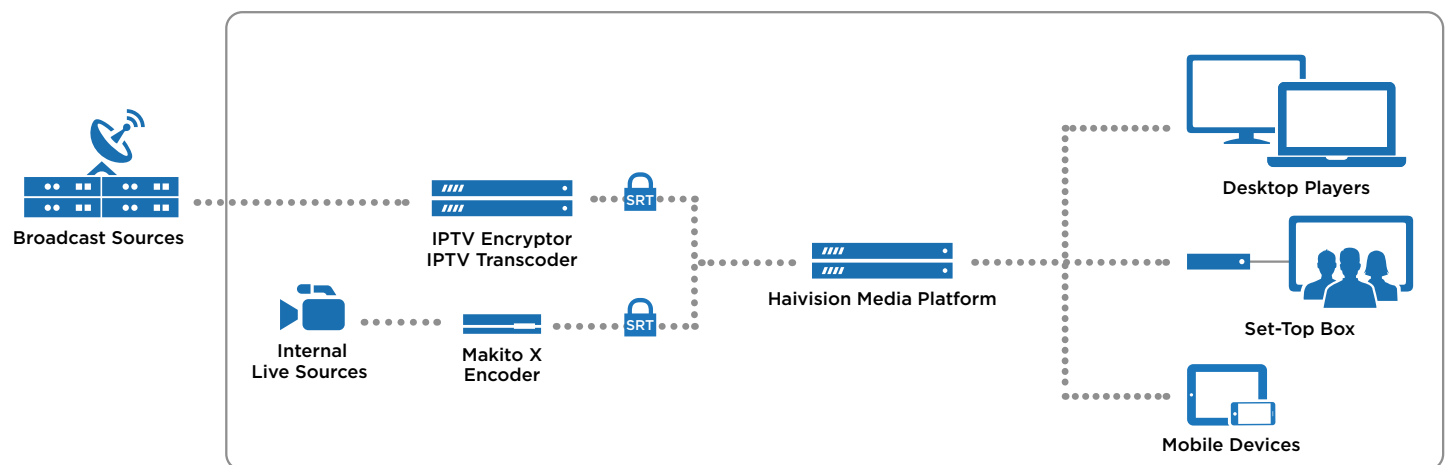

Corporate TV provides an efficient, high-impact visual messaging to staff across the organization - broadcasting corporate news, special events, internal marketing campaigns, HR training, and social events. Both live and on-demand video content can be displayed on TVs in order to visually inform and engage the workforce, reinforce the brand, and help foster corporate culture. The Haivision Media Platform makes it easy to manage and distribute a tailored message to employees throughout lobbies, conference rooms, public areas and desktops.

Live TV

Deliver live broadcast channels throughout the organization and give employees the ability to watch live news, sports and events as they happen.. Stream important sporting events and breaking news to TVs in the cafeteria, lobbies or break spaces, and even on desktop web browsers so that employees can keep an eye on the world while at work. Haivision Media Platform's centralized administration and scheduling tools control what channels employees see, on what screens, and when.

Mission Critical TV

Keep employees on the pulse of important events so they can react quickly to market changes and breaking news. Financial organizations such as hedge funds, banks and commodity trading firms need to bring live video content, including broadcast channels, analyst briefings and IPO updates directly onto desktops and TVs on trading floors. This makes it easier for traders to gather time-sensitive information, analyze the market, and complement data analysis and valuation. The Haivision Media Platform can provide employees with real-time access to breaking news from around the world, right at their desk, so they can make informed decisions, faster.

OPTIONAL ADD-ONS

Haivision IPTV Encryptor

Receives encrypted streams from commercial broadcast sources for secure delivery within the Haivision Media Platform.

Haivision IPTV Transcoder

Receives and transcodes streams from internal and commercial broadcast sources for secure delivery within the Haivision Media Platform.

PERFORMANCE RECORDING FOR RESEARCH TEAMS AND TRAINING FACILITIES

The Haivision Media Platform Workgroup Edition is designed for teams that need to watch and record multiple synchronized HD video sources for review and analysis. Ideal for research of all kinds (including usability testing, focus groups, simulations, and training,) the Workgroup Edition lets you record up to 50 simultaneous streams¹ and apply powerful metadata to quickly find important moments in the video.

UX & Usability Testing

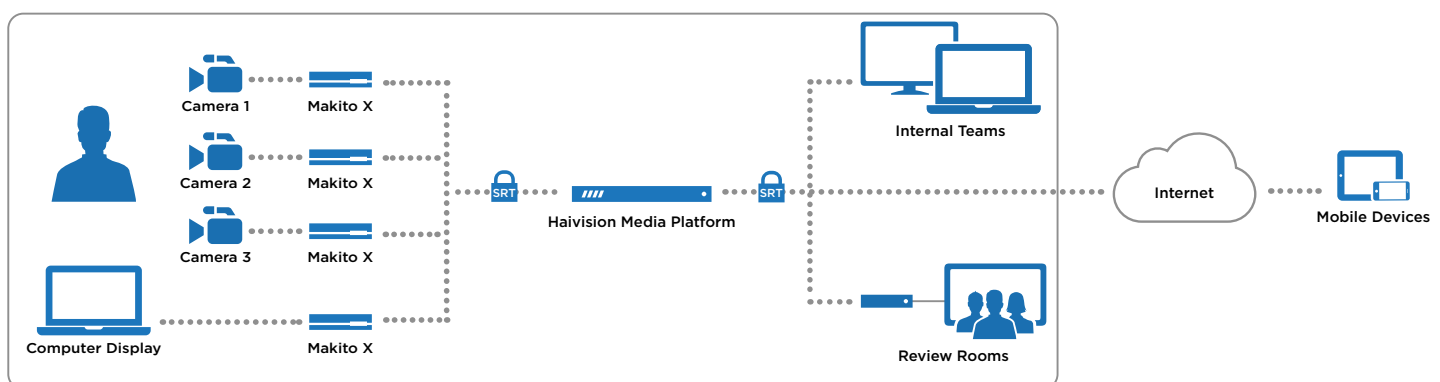

Never miss the critical moment of discovery. When conducting research like product testing, focus groups and usability labs, record from multiple cameras and sources and make the content available for viewing and review by stakeholders. The Haivision Media Platform provides a better way to share live and recorded sessions with research teams and other key personnel across facilities for later review, ensuring that the right audience gets direct input on testing and research. With rich metadata capabilities, content is easy to find, resulting in greatly improved study and analysis.

Simulation Training

More and more professions are pairing video with simulation-based training in order to give trainees and participants a hands-on learning experience with instant feedback. Video recording can increase the effectiveness of the training by enabling instructors and trainees to better observe, assess and review the simulation experience and improve feedback, evaluation and ultimately, the student's performance. The Haivision Media Platform supports simulation training with a powerful multi-source recording engine so that participants can gather multiple viewpoints to watch live or for later assessment. Archived recordings can be easily retrieved thanks to the Haivision Media Platform's rich metadata tagging and search capabilities.

Clinical Training

Continuing medical education programs and teaching hospitals can improve clinical supervision and better assess and care for patients by improving the collaboration and training of their staff. With the insight that video brings, doctors can offer feedback and assessments to the clinical staff to improve or change their clinical procedures and performance. Doctors can also collaborate on the diagnosis and treatments for the patients. With the Haivision Media Platform's remote access features, doctors, clinicians and staff can supervise clinical diagnosis and treatments to make recommendations using live and on-demand video. Now team members can watch a clinical testing session from any laptop and mobile devices on the hospital campus. For group viewing, entire teams or classes can watch live or on-demand recordings in conference rooms, classrooms, and auditoriums on dedicated set-top boxes or on Apple TV. With any application of video in a medical environment, security is critical to helping protect patient confidentiality. Haivision's video solutions support end-to-end encryption of all content and can be included in solutions that support HIPAA compliance.

¹ The actual number of simultaneous streams is a function of the underlying hardware/VM and network capacities.

SECURE, HIGH QUALITY EXPERIENCES

With Haivision Media Platform, users can watch live and on-demand video from the portal in a web browser, displaying up to (4) synced HD sources at once (i.e., four news channels, or a CEO and full-motion presentation). Administrators can also embed a single or dual stream player directly within company portals and intranets like SharePoint, Jive, and IBM WebSphere.

Haivision Play

For users who require more powerful viewing options, Haivision Media Platform supports Haivision Play, a series of high performance video player applications for mobile devices, desktops, managed set-top boxes, streaming media players, and Smart TVs.

High quality, low latency

Users of Haivision Play can enjoy the highest quality, lowest latency video and audio playout.

Dual Stream Player

Haivision's dual stream player gives viewers a closer look at the presenter and their content.

Mobile Viewing & Streaming

Stream live, record and watch from anywhere directly with Haivision Play Mobile on iOS and Android.

Group Viewing

Stream live events to conference rooms and auditoriums with Haivision and Apple TV set-top boxes.

Set-Top Box Management

Haivision Play Set-Top Boxes can be easily controlled and managed with Haivision Media Platform.

End-to-End Security

Protect content from unauthorized viewing and sharing with multicast AES and encrypted HLS.

IPTV Channels

Give employees that ability to watch authorized IPTV channels when they need it, wherever they may be.

Authentication and permissions

Give employees access to the content they need across devices with ADFS SSO, Active Directory and LDAP.

Professional Services

Haivision's experienced Professional Services team is prepared to assist customers with nearly any streaming related challenge, including pre/post sale network consulting and system design, turnkey implementation, customized cloud hosting, training, remote system/event monitoring, event staffing, event production, and on-site badged-staffing.

¹ The actual number of simultaneous streams is a function of the underlying hardware/VM and network capacities.

HAIVISION MEDIA PLATFORM

ALL HAIVISION MEDIA PLATFORMS:*Management Interfaces:*

Haivision Media Platform Portal
REST API
Command Line API
Console UI

Audio/Video Formats:

H.264
ACC-LDTS Audio

Inputs:

MPEG-2 Transport Stream
SRT (Secure Reliable Transport)
RTSP/RTMP (Requires HMG)

Outputs:

MPEG-2 Transport Stream
SRT (Secure Reliable Transport)
HLS (with end-to-end encryption)
RTMP, RTMPS, RTMFP

Standard Features:

Web-based admin & management
User authentication, conditional access, LDAP/AD
HTML5 Player with Flash optional
Roles & permissions
Stream source management
Set-top box management
Content, system, and user activity reporting

ALL HAIVISION MEDIA PLATFORM SYSTEMS:

Rack mountable
Secure Linux-based OS (NIST 800-53 r.4)
Intel® Xeon® processors
Redundant hot-swappable power supplies
RAID configurations w/ hot-swappable drives
100-240 VAC

**ALL HAIVISION MEDIA PLATFORM
VIRTUAL MACHINES:***Compatible with:*

VMware VSphere ESXi 5.5 and above
Requires VMWare or NAS storage. We highly
recommend using NFS for NAS storage (NAS
should be on same LAN segment as HMP).
